1.	INDG 10000	Decolonizing Knowledge: Introducing Indigenous Ways of Knowing and Being	Society & Commerce	Focusing on decolonization, let's engage with Indigenous epistemologies and worldviews as a means to critically examine Western knowledge systems and re-evaluate our respective roles with Truth and Reconciliation in Canada. This introductory course invites students to build their respective knowledge bases by engaging with Indigenous Voices from across Turtle Island through a variety of vetted media and readings. A Two-Eyed Seeing framework will include selected authentic Indigenous approaches to Teaching and Learning alongside Western pedagogical practices. Students will better appreciate their roles and responsibilities as Treaty People towards Reconciliation in what is now Canada.	12832	Oshawa	Wednesday	12:10	14:00	
2.	INDG 10000	Decolonizing Knowledge: Introducing Indigenous Ways of Knowing and Being	Society & Commerce	Focusing on decolonization, let's engage with Indigenous epistemologies and worldviews as a means to critically examine Western knowledge systems and re-evaluate our respective roles with Truth and Reconciliation in Canada. This introductory course invites students to build their respective knowledge bases by engaging with Indigenous Voices from across Turtle Island through a variety of vetted media and readings. A Two-Eyed Seeing framework will include selected authentic Indigenous approaches to Teaching and Learning alongside Western pedagogical practices. Students will better appreciate their roles and responsibilities as Treaty People towards Reconciliation in what is now Canada.	14315	Whitby	Wednesday	15:10	17:00	
3.	PHIL 10000	Ideas that Matter: An Introduction to Ancient Greek Philosophy	Culture, Arts, Humanities and Self	Ancient Greek philosophy is the first chapter of Western philosophy, and in many ways an unparalleled one. We will discuss the emergence of Western thought (philosophy and science) about 2600 years ago in the city of Miletus. Then we will study the philosophers who followed: Parmenides, the Sophists, Socrates, Plato and Aristotle, among others. Some of the questions we are going to explore are: What is the nature of reality? What does it take to know something? What is man's place in the universe? What is the best political system? What is a life worth living? We shall attempt to find answers through lectures and class discussion. Students will be evaluated by a variety of written assignments, discussions, and tests.	13520	Oshawa	Wednesday	12:10	14:00	
4.	PSYC 10003	Principles of Psychology	Culture, Arts, Humanities and Self	Following a brief history of psychology, this course introduces students to the basic concepts and issues of modern psychology including the scientific study of behaviour, motivation and emotion, learning, memory, sensation and perception, the biological basis of behaviour, psychological disorders and their treatments, and social psychology. Connections to everyday experiences will ground the exploration of psychology through student-centred learning activities.	13635	Online-asynchronous

Winter 2025 Upper-Level Degree Breadth Electives

NOTE: To be eligible to register in an upper level breadth course, students must have already successfully completed one lower-level breadth course.

Option	Course Code	Course Title	Category	Course Description	CRN	Location	Day	Start Time	End Time
1.	HURS 22001	Integrative Leadership	Society & Commerce	Are you wondering how you can develop your leadership capacity toward a sound, sustainable shared leadership approach that addresses challenges together? This course explores a holistic or integrative theory and practice of leadership formation and enrichment: where “success” is not only determined by control, efficiency and outcomes, but by the conscious way people learn, collaborate and flourish toward the betterment of self, others and the world. Students will explore their own orientation to leadership and life – as they engage in self and social reflection to formulate a practice of integrative leadership that supports individual growth and a more balanced and environmentally sustainable planet.	12821	Oshawa	Friday	10:10	12:00
2.	SOCI 20001	Issues in Sociology	Society & Commerce	This course expands on sociology’s unique perspectives, key concepts, and modes of exploring the social world. Issues in sociology will explore the interaction of people with each other and various social groups. Students will explore social stratification, poverty, group dynamics, government and power, media and technology, aging, urbanization, the environment, and social change.	13791	Online-asynchronous
