

DANIELA SARMIENTO

Chemical Laboratory Technician Program
International Student from Uganda

STUDENT TESTIMONIAL

My name is Daniela, and I am an international student from Colombia. I can say that this journey has been such an incredible experience, full of personal and professional growth. It was all possible thanks to Durham College.

I had the opportunity to work on-campus through the International Summer and IWorks program in the International Admission Office for one year. This is one of the many ways Durham College supports international students and I am grateful for it.

We as international students have to find ways to keep ourselves up-to-date with the latest information, such as bursaries, on-campus jobs, arrival services, and hired portal services. Durham College also has international student advisors and career development coaches who are always willing to help students.

My journey at Durham College has had many challenges and opportunities. The faculty and staff members have been there when I needed them which has helped me immensely.
