

## SOLUTIONS FOR YOU

Work with Durham College to develop real-world solutions for your business or organization. Connect with skilled students and expert faculty members or researchers through our project marketplace to address your business or community challenges.

The marketplace is free to join and helps you access student talent through class projects, placement opportunities, and applied research. Projects can include business solutions, process improvements, design challenges, community innovation, and more.

## HOW IT WORKS

1. Join the DC Project Marketplace and start posting your organization's projects. [Click here](#) to create a company profile and get started now.
2. Explore collaboration opportunities posted by our faculty members and staff letting you know what skills and resources we have available.
3. Connect! This can be initiated by you or DC.  
Let us know if you're interested in an opportunity posted in the marketplace.
