1. Introduction

This Emergency Management Plan (EMP), policy and procedure provides direction to those College officials assigned to respond to an emergency incident that may threaten the institution's purposes and the safety of its students, employees, visitors or the institution itself. As a general practice, Durham College makes the effort to maintain normal operations. However, there may be occasions where normal operations would pose a danger on the school and the community and a decision to close the institution must be made. A closure of the College, in a whole or in a part, may be prompted by inclement weather, a utilities failure or emergency incident that place members of the community at significant risk. If there is no specific announcement about a closure, Durham College will remain open.

2. Purpose

The objective of this policy and procedure is to ensure the College can prevent/mitigate, prepare and respond effectively to an emergency incident. This policy and procedure provides a framework for enhancing the safety and security of its operations, mitigates the long-term effects, and sets clear procedures to be followed. Also, it outlines the considerations relating to the essential services, special assistance, academics, business activities, critical infrastructure protection, and compensation during College closures.

3. Definitions

Any activity (class, lab, or examination) that would continue past the specified closing hour is cancelled or rescheduled in its entirety.
