

## AADITYA SIKKA

Computer System Technology Program  
International Student from India

# STUDENT TESTIMONIAL

My journey at Durham College has been transformative. Achieving my networking certifications, with the college's support, stands out as a major milestone. Thom MacDonald, the dean of my program, played a pivotal role during a challenging phase, offering unwavering guidance and belief.

Volunteering at the IT expo expanded my network and opened doors to hands-on experience. The bonds I've built on campus are profound; they've been instrumental in my professional trajectory, leading to my first college job.

The DC IWorks program broadened my horizons. Working across diverse departments, and now in International Education, I've amassed a rich skill set. The camaraderie and support I've encountered are unparalleled, fostering both my mental and physical resilience.

In essence, Durham College hasn't just been an educational institution for me but a foundation for personal and professional growth. Grateful for this journey, I'm Aaditya Sikka, proudly carrying forward the Durham legacy.
