This Recognition of Achievement program is designed to provide RNs and RPNs like you with a comprehensive knowledge of oncology nursing theory. As well, the clinical component will allow you to apply the concepts you learn in class.

PROGRAM OUTCOMES
Upon successful completion of this program, graduates have reliably demonstrated the following learning outcomes:

• Conduct comprehensive physical assessments and holistic health histories on a variety of individuals;
• Establish and maintain a helping relationship with oncology and palliative care patients and their families throughout the trajectory of the cancer experience;
• Apply current research regarding various cancers, their prevention, diagnosis, symptoms, progression, and treatment, to the care of oncology patients within an interdisciplinary team setting;
• Apply knowledge of the physical, psychosocial, and sexual impact of cancer and cancer treatments on oncology patients and their families to their care and counselling;
• Practice in a professional manner in accordance with all relevant legislative, ethical, and professional standards of practice.
