

A wide environmental palette has been established to help brand spaces. Neutrals have been selected to highlight the core colours, and a secondary palette established with flexibility in mind.

WALL PAINT

WINDOW FROSTING

NO FROSTING
Front-line student service areas, academic school and faculty offices should be open and welcoming, therefore frosting should not be used on glazing to limit visibility into these spaces.

PRIVACY FROSTING

- Privacy frosting is reserved for only those areas/offices that REQUIRE a high-level of privacy, such as those conducting human resource discussions, counselling or medical appointments.

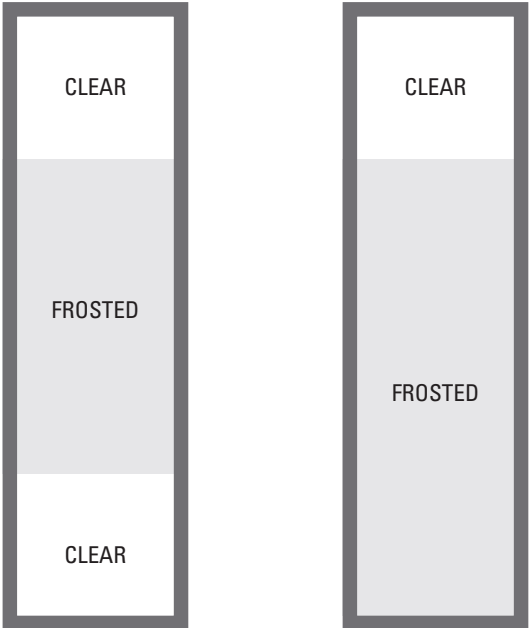

Individuals are encouraged to use provided meeting rooms as required for sensitive discussions.

FROSTING STANDARD:
50% opacity frosting covers 50 per cent of the glazing area. Top and bottom 25 per cent of the glazing is left transparent as illustrated in example 1. This ensures health and safety requirements are met.

- Some areas of the college serve external clients and require higher levels of privacy, such as the Durham College Spa and Dental Clinic.

FROSTING STANDARD:
50% opacity covering 75 per cent of the glazing area (see example 2)

Relevant branding to be included where applicable.

1. 50 per cent glazing coverage. 2. 75 per cent glazing coverage.

FROSTING REQUESTS

Requests for window frosting can be submitted to the Service Desk at servicedesk@dc-uoit.ca

TASK CHAIRS

LUMIN CHAIR,
